

SAUNA^o

by THERMORY[®]

Get in on
the original.

It's better in the barrel.

Rethink your relaxation.

Sometimes you feel like the only difference between you and a superhero is the cape. But when your work is done, it's time to power down.

Once you step into a Thermory Barrel Sauna, you escape into your own private sanctuary of heat, steam, and quiet comfort, unmatched by any other barrel.

You work hard enough. Now, it's time to claim your reward.

Sauna's evolution from its European bathhouse roots to becoming a global lifestyle is no accident. Because people discovered that using saunas was an experience that could be as social as it was spiritual.

A Thermory Barrel Sauna gives you the freedom to create your own environment. It can be calming one day and spirited the next.

Imagine what you would do in your own Thermory Barrel Sauna. Then, make it yours.

Rethink your routine.

The way you recover from your workout can be the difference between pushing hard today and pushing even harder tomorrow.

A Thermory Barrel Sauna is your own personal space to speed your body's natural healing process through the power of heat and steam.

Just relax and let your sauna do the work to help rejuvenate sore muscles, improve joint movement, and eliminate the toxins that build up during exercise.

So, no matter what the gym takes out of you, you always finish strong.

Rethink your recreation.

Apologies to your charcuterie spread ... but once you have your own Thermory Barrel Sauna, your friends won't want to hang out anywhere else.

With space for up to six and more room to relax than other barrels, a Thermory Barrel Sauna gives you and your crew an exclusive spot to get together and be yourselves.

Just don't blame us when nobody wants to leave.

All-weather protection

Your Thermory Barrel Sauna's thermally modified wood is built to withstand the elements for up to 25 years. But if you want to baby this beauty, the rain jacket is included for coverage in wet weather.

Extra-wide window

No matter what's outside—rain, snow, jealous neighbors—enjoy the view through your Thermory Barrel Sauna's dramatic, half-moon-shaped window.

Sitting porch

Your Thermory Barrel Sauna's optional porch is the perfect place to take breaks between sessions. It's also a good spot to leave your shoes, your robe, and your troubles.

Spacious interior

Boasting an interior of nearly 250 cubic feet, Thermory Barrel Saunas give you nearly 50% more room than other barrel saunas. And with a diameter of more than seven feet, you can make taller friends.

7.3 feet

Heating options

With a minimalist design and high stone capacity, HUUM heaters give you long-lasting heat and steam. And your sauna's curved interior ensures even heat distribution, so nobody fights for the "good seat."

250 cubic feet

No. 60

Functional design

Thermory Barrel Saunas are larger than standard barrel saunas. The spacious interior—measuring seven-plus feet across—offers a greater height for standing and deeper benches for lying down. Plus, thermal modification ensures the wood is never too hot to stand or sit on.

Easy assembly

We pride ourselves on our attention to detail—right down to our installation guide. Your Thermory barrel sauna comes with pre-cut and pre-milled staves and cradles, so there’s no cutting necessary. And if you choose an electric heater, you’ll need a 240 volt line and an electrician to finish the job.

Floor kit

All Thermory Barrel Saunas come with a floor kit so you can walk comfortably on a flat surface.

Keystone staves

Our saunas are thoughtfully constructed with a keystone stave at the top and bottom. These allow the remaining staves to point upward to reduce the potential of water being trapped in the gaps and improve rot resistance.

Stave thickness

Our staves are thicker than most (if not all) in the barrel sauna market. This contributes to your sauna’s solid construction and overall weight, giving you greater durability and heat retention while minimizing noise from outside your barrel.

Color transformation

The color of Thermory Nordic spruce transforms into a distinguished silver when exposed to sunlight and rain. But if you’re not ready to go gray, simply treat the boards with a penetrating UV protective oil.

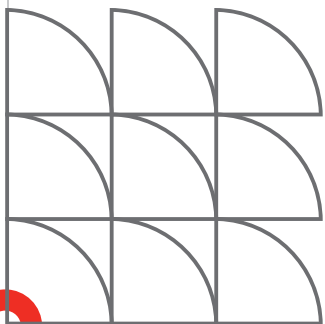

No. 60

Bold design

Blending rustic charm with modern European details, your Thermory Barrel Sauna transforms gorgeous Nordic softwood into an extraordinary space to relax and indulge. Some days, you'll just stare at it.

If it's good enough for them, it's good enough for you.

When you supply the wood to build saunas in Scandinavia—the home of sauna culture—you must be doing something right. So, go with the barrel sauna chosen by the people who know best.

Thermal modification

Ours are the only thermally modified barrel saunas in North America. So you get the beauty of real wood, naturally enhanced with only heat and steam for unequaled durability and stability—even in climates that experience extreme changes. It's the most ideally suited wood for your sauna experience.
